Specializing Generalist for Agile Development

Java, React, Go,
E2E Test Automation

CI/CD, ATDD, Quality

Product Owner,
Developer

Professional Summary

Senior Software Engineer and Quality Specialist with over 15 years experience across industries and time-zones. Specialises in test automation, CI/CD pipelines, and enabling high-performing agile teams. Adept at integrating new technologies and practices into legacy systems, bridging development and quality with hands-on technical delivery and coaching. Known for a collaborative, transparent approach, driving measurable impact. Proven record of improving system performance, delivery velocity, and product quality in finance, e-commerce, and automotive sectors.

Industries:

- Financial
- E-Commerce
- Retail
- Automotive
- Physical Storage

Tech:

- **Languages:** German(native), English, Java, Kotlin, Javascript, Typescript, Golang, Shell
- **Frameworks:** Spring Boot, Ktor, Quarkus, React
- **Cloud & DevOps:** GCP, Docker, Kubernetes, Helm, GitOps, CI/CD, Gitlab
- **Quality:** Test Automation (Playwright, Selenium, Custom), BDD, Performance Testing, ATDD
- **Data & APIs:** PostgreSQL, Kafka, REST, gRPC, GraphQL, Firestore
- **AI:** using genAI to enhance good development practices, builder of small scale personal assistants and LLM-based games

Social:

- **Great Teamwork:** focuses on unblocking others and providing best cooperation with honest, transparent vision, strategy and plan
- **Deal in Ambiguity:** assists effective stakeholder and dev communication, makes quality visible, aligns team on measurable conversions
- **Continuous Delivery:** focus on customer outcomes, deliver often, small value iteratively, invite continuous feedback
- **Clean Language:** tools for dealing with drama, providing feedback and gathering high quality data
- **Adaptable:** sufficient knowledge of plenty of things, works well in fully remote international teams, also enjoys meeting folks for real

Certificates:

Clean Agile Systems Coaching **ICP-SYS 2023**, Professional Scrum Product Owner II **PSPO II 2020**, Professional Scrum Product Owner I **PSPO I 2020**, Certified Tester Advanced Level Test Automation Engineer **CTAL-TAE 2018**, Certified Tester Foundation Level **CTFL 2018**, Oracle Certified Professional, Java SE 8 Programmer II **OCP 2017**, Oracle Certified Associate, Java SE 8 Programmer **OCA 2015**, Certified Scrum Master **CSM 2013**

Besides:

- partner is middle school teacher and likes hiking and soccer
- son born 2017, also big into soccer
- gamer, game dev, musician, dog owner (Maltese)
- wants to: actually marry, ensure good education for the son, provide nice vacations for the family, build more personal connections

Full Work Experience:

2024-2025 - Integration Test Engineer, 12 months for Yunex Traffic

- delivered performance test framework with 20 extendable performance scenarios, running multiple times a day, covering synch and async interfaces
- set up 60 day dashboard of performance results and threshold alerting
- full requirements traceability through Jira and Xray, features and test plans; scenarios are linked to actual customer requirements. results are used in bids for 3 international tenders
- supported team of 6 engineers and the orgs platform team with useful data, did a great hand-over to the teams dev and test leads

Golang, Websocket, Kubernetes, Kafka, Microservices, Performance Test, Kafka, Gitlab CI, Xray, Grafana,

2021 - 2024 Test Automation Teacher, Coach, Mentor for 3.5 years for Serenity Dojo

- supporting ~50 mentees over the years with custom exercises, coaching and other things they need

Java, Javascript, Selenium, Cypress, Playwright, Cucumber

2022 - 2023 - Contract Full-Stack Developer and Product Owner, 12 months for Mediamarkt Saturn

- solo dev, 5 nearshore quality engineers, later joined by a PO
- tasked with improving support requests and automating test data management, working with legacy systems while supporting cloud migration
- acting PO for 4 months, helped manage the work with the team while building services for the team
- built system that makes support cases easier to handle with focus on customer satisfaction while adhering to the organisation's rules
- delivered extended product search, hosting a curated list of >2k test products with reliable data, integrating jira and a breadth of internal APIs
- over time 170 internal users and overall great feedback. Lead time for support requests went down 10 -> 6 working days

GCP GKE, Kustomize, Flux, Spring Boot, React, GraphQL, EDI, Stakeholder Management, Kanban

2022 - Contract Full-Stack Developer, 9 months for Ivy GmbH

- dev in a team of 7, startup
- delivered microservices, cloud functions and react apps to run on GCP
- created tools for testing with message queues and real devices
- set up data ingestion pipelines and dashboards for IoT device events. e.g. in graphs showing when and how many of 1.5k voltage meters in 7 locations report being On each second
- the most liked thing by management was continuously scraping web apis and generating a daily report about current market developments regarding competitors resources and pricing

Terraform, GCP, IoT, MQTT, gRPC, scraping

2021 - 2022 - Contract Backend Developer, 13 months for Equal Experts

- solo backend dev with 4 android devs and a PO
- replaced monolith functionality with dedicated microservices for warehouse management
- encouraged and helped PO getting customer insights through interviews
- guided the android team writing maintainable UI automation, setting up the framework, pairing and providing example tests
- the android app served 50 German stores well enough, so it was scheduled to release in America next

Spring Boot, Java, Android

Andreas Worm - Germany - Munich (hybrid)

[+4915156063252](tel:+4915156063252) andreas.worm@headissue.com <https://www.linkedin.com/in/andreas-worm> <https://linktr.ee/theglobalworming>

2019 - 2020 - Krauss Maffei - polymore.com

Developer, 4 months

- dev in a team of 8 people, 2 backend, 2 frontend, 1 PO, 1 UI/UX, 2 SMEs
- delivered on time and scope complete B2B marketplace from very vague requirements to the total satisfaction of the client
- shown leadership and care for the clients success by addressing delivery process problems and aligning the team on meeting the clients demands through agile and acceptance test driven development

Product Owner, 3 months

- set expectations, engaged Management, Sales, Customer Support and other Stakeholders on what space this role needs to fill
- cleared QA and decision making bottlenecks and enabled Continuous Delivery
- 3 new increments delivered to production
- used actual usage to increase customer satisfaction, resulting in a less complex product serving the customer better
- project cut short due to global covid pandemic unfortunately

Kotlin, Spring Boot, PostgreSQL, Hibernate, Maven, AWS, CircleCi, Webflow, Selenium

2018 - 2019 - Agile QA for 11 months for FinTech Start-Up

- team of 10 backend, frontend, and UX persons with PO
- delivered awesome browser based e2e test feature coverage, with 50 flows running in continuous integration.
- in-sprint test automation, thus preventing lots of wasted QA and Product Owner time
- made quality visible with public dashboards, noticeably decreasing dev team disturbances by answering stakeholder questions preemptively
- providing live and historical data on third party reliability, giving the PO leverage on bringing issues up with Stakeholders.
- delivered 6 screenshot taking utility flows, used to make copy-writing and legal review more efficient
- got things done in a very restrictive environment

Java, Maven, Selenium, Serenity BDD, Jenkins

2010 - Apprentice turned Developer for 8 years for München Ticket GmbH

- 8 years of continuous improvement for an e-commerce storefront integrating SAP Event Ticketing.
- delivered a feature-rich, high quality product with a team of ~8 people
- demonstrated success in Software Developer, BA, QA and Product Owner roles
- owned features throughout their whole lifecycle, e.g. gathered requirements and researched unintended impact; collaborated with the client on minimum valuable products, roadmaps for various improvements, and estimations
- managed a Jira with >15.000 issues, sometimes dubbed "archeology"
- managed e2e test automation of 300 test cases running in CI
- coordinated page redesign, publicized invitation to tender, selected vendors to present to the client
- rebuilt the presentation source code on Atomic Design Principles

Java, Tomcat, Servlet API, JSP, Thymeleaf, Elasticsearch, Patternlab, Html, Css, Javascript
